Subject: 2018 Air Quality Data Certification Guidance

Gordon:

Not sure who you have assigned this year's data certification to, but the guidance and Q&A document has been posted at <https://www.epa.gov/amtic/data-certificationvalidation>.

We know of one error in the Q&A: in the table on page 9, it says that if QAPPs have not been approved within the past 10 years, the recommended certification code from AQS will be "N". In fact, as is stated elsewhere in the guidance document, that period has been changed to 5 years in AQS beginning this year.

Please let me know if you have questions.
